Good Skate Warbles On Radio Too

1571-SEVENTH YEAR. VOL. LVII, No. 111 TUESDAY, MAY 18, 1937

500 American Soldiers Die In Spain War

MADRID, May 18.—American volunteer battalions in the Spanish civil war estimated today to have lost almost a third of their number.

Reliable sources placed the number of United States citizens killed while fighting on the government side at more than 500, or 30 per cent of the 1,700 reported to have been killed since the conflict started 10 months ago.

An overwhelming majority of the American volunteers lacked previous military experience. The largest contingent was the 16th Infantry, of Albany, Lincoln battalions.

SOMERSET, England.—Something more you didn't know, Sonja Hene is not only famous as a skater, but she warbles, too. She will be heard on one of the big networks next Sunday in her debut before the Listening-in fans. Critics say her voice is nearly as good as her skates.

50 MILES OF WARSHIPS TO BE REVIEWED

Halt Given Imperial Conference As Great Naval Day Approaches

London Bureau of the Edmonton Bulletin and Winnipeg Free Press. LONDON, May 18.—Taking time out for the Whitstable holiday and the naval review at Spithead today fifty miles of British fighting ships will be reviewed by King George VI and the prime minister.

The review will be the last of the series of events which will mark the 50th anniversary of the outbreak of the war.

Runaway Pair; Churchill's Kin Wed In France

BAYONNE, France, May 18.—Emmett Romilly, nephew of Winston Churchill, and Hon. Jessica Freeman-Mitford, daughter of Lord Bessborough, were married by the British consul here today.

The pair attracted public attention some months ago when they ran away to Spain. Some reports said they intended to join the Spanish government forces but it was later explained they had gone to Spain to do newspaper work.

Plans Made To Picket Theatres In Chicago Area

LOS ANGELES, May 18.—Plans to picket "every theatre in the Chicago area this week" were announced today by the striking United States Film Crafts men in their campaign for a nation-wide boycott.

Effectiveness of the picketing was shown, officials said, by plans they received from southern California theatre owners that the managers be withdrawn. The leaders declared they had no intention of withdrawing the pickets and were pressing their campaign in the larger cities.

France Likely To Call Off N.Y.-Paris Trans-Oceanic Hop

PARIS, May 18.—The New York Post "Lundberg" probably will be called off by the view of official United States opposition to the hop, which is a short-cut circle here today.

Pierre Cot, air minister, was reportedly called on the new proposal that the hop be held with a starting point in Canada (instead of the United States).

Envoy Resigns

VALENCIA, May 18.—Luis Arce, Spanish ambassador to Paris, resigned today shortly after Premier Juan Negrin's new cabinet took office. No reason was announced.

FOUNDATION FOR NEW ALGOA MACHINE BARED

E.L. Gray May Be Selected As Liberal Chieftain

Likely Leader

Manager of Eastern Irrigation District Is Prominently Mentioned

Will known to many residents of the city through his work as provincial field crops commissioner for Alberta from 1930 to 1934, and deputy minister of provincial affairs from 1934 to 1935, during which time he was resident of Edmonton, Edward Leslie Gray, now manager of the Eastern Irrigation District at Brooks, Alberta, is being prominently mentioned as the probable leader of the Alberta Liberal party following the provincial convention which will be held at Calgary the first week in June.

Born in Gray county, Ontario, some 41 years ago, the son of Mr. and Mrs. Sam W. Gray, the prospective leader came with his father and mother to Weyburn, Saskatchewan, while still a small boy. The family moved to Edmonton and Mr. Gray was educated in the public schools there and at Regina. Afterward, he taught school for two years before enrolling in the Canadian Expeditionary Force for service.

ALBERTA GOVERNMENT OVER LEGISLATION

CO-OPERATION ATTEMPT FAILS SAYS SPEAKER

Conclude Told Powers Want Not Social Credit But Co-Operatives

Retail merchants must show "a united front" with wholesalers and manufacturers if they intend to survive the coming month, argued A. C. Mackay, of Calgary, secretary of the Alberta Retail Association, addressing a meeting of his group Monday night at the Hudsonia.

Also present at the meeting were representatives of the retail and wholesale sections of the Edmonton Chamber of Commerce, Frank Pepper presented.

It was decided to form a striking committee comprising members of the retail and wholesale sections of the chamber, representatives of the retail association, and representatives of manufacturers to consider the appointment of men to work on common policy of co-operation.

It was also urged that the retail association must not rely solely upon co-operation, but must strengthen its prestige by its membership drive.

"Our association has honestly tried to co-operate with the government. But somehow we never could get any co-operation," said T. H. Johnson, of Hamilton, retail merchant of the province, "and only collective action will enable us to combat it."

There are two sections in the Alberta government now. The one is the Social Credit. The other is the cabinet wait co-operatives.

"You'll find out" if you let this government go on the way it is going, he warned.

"I heard Premier Abernethy say he would get the whole manufacturing of Manchester to back him up in establishing co-operation. Let him deny that. I heard him say it myself. But I heard him say it for the price will kill him," Mr. Johnson declared.

Urging the need of mature deliberation the meeting accepted the proposal and pointed out that the best method for the retail merchants would be by establishing an authority with an increased membership. H. H. Cooper, city wholesaler, joined issue with several of Mr. Mackay's assertions.

While agreeing with the need of action, Cooper said it was primarily the duty of the wholesaler to solve their own troubles, and to speak as a united and powerful group to the wholesalers on problems common to both.

Other speakers were George Hume, of Edmonton, T. J. Hardwick, of Stoney Plain, who both spoke on behalf of retailers, and W. Brockie, who spoke for wholesalers, and R. E. Emery for manufacturers.

No arrangements were announced as to the date of future meetings.

Swift Company Manager Will Retire May 24th

Ending more than 40 years' service with Swift Canadian Co., Ltd., Gordon S. Robertson, announced his retirement as general manager of the Edmonton branch Monday.

Mr. Robertson said he will formally sever his long association with the firm on Monday, May 24.

George R. Caille, assistant general manager of the Winnipeg plant for the past four years and formerly of Toronto, will succeed him.

Mr. Robertson has had a long and active career with the company. He joined it at St. Joseph, Mo., in February, 1897, having had several years of packing experience prior to that.

Reward for his services came in the form when he was commissioned to act as general products representative of the company in London for two years, a post held for eight years.

For the past decade he has headed the local firm.

Accompanied by his wife, Mr. Robertson plans to spend some time travelling before making any definite decision as to future plans of residence. A married daughter lives in Chicago and they will probably spend some time visiting her.

Chianga Plans Vast Railroad Scheme

NANKING, May 18.—Generalissimo Chiang Kai-shek has drawn up a plan for linking up the Chinese provinces by a 5,000-mile railway line, according to a dispatch from Nanking today.

The plan would probably take five years to complete.

Trend Is Back To Family Physician

TORONTO, May 18.—The trend in medicine is "back to the family doctor," Dr. Russell C. McCaughy, executive secretary of the American Osteopathic Association, said Monday at the convention of the Ontario Academy of Osteopathy.

Heiress's Third

Continued from Page One

ing of brush and construction of small stone fire-places for campers and picnicers along the river between the city and White Mud creek.

The home-building project sponsored by Mr. Litchfield calls for a total expenditure of \$60,000, the city providing \$20,000 and the federal government 20 per cent or \$10,000 as provided for under the Dominion Housing Act for the erection of new dwellings.

REVOLVING FUND

Twenty-five houses, costing a maximum of \$3,000 each would be built in the initial program. A revolving fund would be established to ensure the continuation of the program, proceeds derived from sale of homes built the previous year being reinvested.

Mr. Litchfield estimated that the first year's revenue from the sale of municipally-built homes would total \$17,000, exclusive of interest on the loans.

Over a 10-year period, Mr. Litchfield reported that the number of homes erected would be 250; the principal amounts derived from the program, reinvested, \$20,000.

Relief Manager McKee's scheme calls for the construction of 35 small cottages, a partial program at a cost of \$600 each, the homes being built by the city and

House Building Plan For Workless Finds Favor With Council

Continued from Page One

accepted by relief cases. They could be built together in a suitable area but would not be provided with sewer facilities, out-houses being required.

The relief official reports such a project would minimize the difficulty of finding suitable quarters for a number of the relief cases, another advantage being that the city would have direct supervision of the construction.

SANITARY CONDITIONS

Dr. R. B. Jenkins, medical health officer, reporting on this scheme, finds there would be no objection providing proper sanitary conditions were observed and providing the site for the project were chosen in the vicinity of schools.

John Marshall, city architect and building inspector, recommended to the committee that homes built be of the four-room and two-room type, and that in the case of two-room cottages, these be constructed as semi-detached cottages under one roof.

In submitting his brief Mr. House argued that direct relief was essential and that the unemployment problem could be handled by cash relief and a work-along program—cash relief for those physically unable to work and jobs at wages for those who could.

WORK 50 PER CENT

Unemployment is believed that 25 per cent of the married men on relief could be put to work immediately, another 25 per cent being provided with jobs at pay of 50 per cent of their former wages was launched.

He would give each man two weeks work each month at 50 per cent pay, and on the amount the wage-earner would be expected to keep himself for the remainder of the month. He said that wages received for the two weeks would be paid to the man for the balance of a month, and the city is not required to provide these.

WAR MACHINE FOUNDATION IS NOW EXPOSED

Continued from Page One

structure, whose foundations are now being laid, does not provide for an increase in the army, does provide for the greatest navy and airforce in Europe, with the exception of the United States, in the world.

This war machine is designed on the assumption that war between the United States and Britain is inevitable.

CONTINGENCY RULED OUT

Such a contingency has been ruled out. United States armaments have had no bearing or influence whatsoever on the British plan. It is true that the British parliament declared the augmentation that Washington might build ship for ship and increase naval caliber from 14 to 16 inches.

But this enthusiasm sprang from the conviction that whoever the U.S. may fight, it will not be the Empire, and chances are, it will be with the Empire. The picture revealed by the recent vote, plus the military papers and speeches of the various ministers is this:

In five years Britain will spend \$2 billion of dollars on armaments. If the international situation should arise, it will be up by another two billions.

The military normal expenditures in this period would have been \$2 billion. The amount of the increase, therefore, is \$2,500,000,000.

In the current fiscal year ending March 31, 1936, expenditures will be \$1,500,000,000.

NAVY \$525 MILLIONS, INCREASE \$125 MILLIONS

Airforce \$412 millions, increase \$125 millions.

Army \$110 millions, increase \$125 millions.

The airforce expansion program was launched in 1933.

In two years the airforce has increased \$80 million per annum. Instead of being merely an auxiliary to a major service, it is now the second most important service and it is continuing to expand as it may well do—it will pass the navy and will be the largest of the three.

ARMY MARKS TIME

While navy and airforce are being expanded like plants for food in a hot house, the army marks time. The increase in the army will be merely for the replacement of the existing force.

E. L. GRAY MAY BE PROVINCIAL LIBERAL CHIEF

Continued from Page One

services overseas. A brother who also enlisted with the famous Princess Patricia was killed on active service.

Following his war service Mr. Gray farmed near Weyburn and also attended the Ontario Agricultural College at Guelph, Ontario.

On graduation from that institution he entered the service of the Ontario government, and spent one year at Chatham, Ontario, with the Ontario department of agriculture.

In 1925 he came to Alberta on the C.P.R. and was employed by the C.P.R. as a district agricultural agent at Hanna, Alberta.

In 1929 he was promoted to provincial field crops commissioner and brought to the head office of the Alberta department of agriculture here.

In 1934 he was appointed deputy minister of municipal affairs in Alberta, resigning that post in 1935 to accept the general manager position of the Southern Alberta Dairy.

LEADING AGRICULTURIST

Ten years ago Mr. Gray was married to Mary Curry, daughter of Mr. H. C. Curry and C. E. Preston Curry at Toronto. He has two daughters, Leila, 8, and Ruth, 5. He is a Protestant, and his religion he says, is his work and his agriculture generally. He is regarded as one of the leading agricultural authorities in the west.

Dupont Admits Sales Made To Reduce Income

NEW YORK, May 18.—Pierre S. Dupont, summoned as a witness by the United States government in 1929 income tax case against him and John J. Raskob, testified today he made cross-sales of securities with Raskob after the Wall Street panic to establish losses which could be deducted from his income tax returns.

The elderly chairman of the board of the chemical and munitions company bearing his family name denied, however, that he and his one-time secretary and business associate for many years placed arbitrary values on the securities sold back and forth.

Moths Feed Heavily On Mayoral Robe

MONTREAL, May 18.—The moth's feast ended today but they must have had a great time while it lasted. Anyhow, it cost the city of Montreal \$14,000 to feed thousands of them on the rich cloth of the mayoral robe.

A city employee discovered the moth problem when he visited the city hall vault where all that remains of the \$14,000 robe were the buttons, a string of thread and remnants of a skin. The moth had fed on the robe.

Montreal Richer On Shame Of Girls

MONTREAL, May 18.—The city had another \$2,300 in the treasury for the shame of girls. The city had 100 and 100 girls paid for the shame of girls. The city had 100 and 100 girls paid for the shame of girls.

BUFFERS MOTORS

Laces, Nets, Chiffons In Black, White And Color Are Irresistible

Sheer Chic For Summer Evenings

Appeal For V.O.N. Is Still Open

Designers Seek Inspiration In Many Fields

Wednesday Morning Special! Special Purchase Sale! 35 'LANSEAU' Brambles

The sheers have never like this spring and summer, as "after the rain" lace, net, guifon, mousseline etc. black, white and soft lovely colors, are perfectly irresistible, especially the evening costume.

Illustrating this article is a particularly charming model in black net worn by Marsha Hunt, professional player. The net is tucked and reinforced with thin black bands, and a pearl necklace and a cluster of orchids at one shoulder complete the costume.

The neckline is low, with narrow bias of black ribbon serving as shoulder straps, and a thin sliver of the net may be worn to cover the shoulders when desired. A thin auburn, a pearl necklace and a cluster of orchids at one shoulder complete the costume.

TINY JACKETS IMPORTANT

Little lace and net blouses and jackets are so very important this season. Lace jackets, in all colors, may be made into very lovely frocks for wear over a large blouse or skirt, and are just right for the formal daytime blouse. A tailored pattern in a flannel lace is especially practical, for it can be dressed enough for evening, over a long slip, and yet look dressy for the afternoon tea.

These blouses come in various styles, with high buttoned neck and short sleeves, or with a wide collar and lots of fringe. The pattern of the lace itself, of course, is a great deal of the interest, the formality or informality of the jacket. A tailored lace in a tailored blouse, offers a very effective contrast with street clothes.

There are so much the vogue that they no longer are new, but new ways in which they are worn. Paris recently was seen a three-quarter length, in black with a white dotted neck veil draped at the top and falling on each side of the cheeks.

FRAMES FACE

These blouses was a good foil, turned up on one side and belted with a similar veil, or draped down all around the face and back of the head. Delightful is Agnes' new type, which has a little of lace veiling about the neck and shoulders, leaving the face and neck clear, and the veil is in a place under the chin.

The idea of blouse made of mesh and lace veiling can be used in many ways and the smart thing to do is to use your own veiling and use your hat to suit your fancy.

Then another whim of the season, believe it or not, is the rump. Perugia has made a pair of pants entirely of lace, and the lace is white, with white kid heels. They are unlined and look lovely over street stockings.

Calendar

Mr. P. H. W. A. meeting Wednesday at 2:30 p.m. in the Parish hall.

Fifth Auxiliary of First Presbyterian Church meeting on the Social Room Wednesday at 8 p.m.

South Edmonton District Girl Guide Association executive meeting at the home of Mrs. E. W. S. Kane, 1181 Edinboro road, Wednesday at 2:30 p.m. Cars at 2:30 p.m.

And how children love Shredded Wheat with hot or cold milk, fresh fruits, or a dozen different ways. The natural food for children—good and good for everybody.

OTTAWA, May 15.—Appeal of Lady Tweedsmuir for \$200,000 in aid of the Victoria Order of Nurses continues open and will remain so for some months longer. It was learned here today, Her Excellency launched her campaign six weeks ago. The response has been gratifying, but the objective has not been reached.

IS NURSES WANTED

The money for which Her Excellency is appealing is needed to meet the cry of those districts without any nursing care, a number of the Government House staff said today. Headquarters of the V.O.N. have received application for 15 districts requiring a resident nurse and of these only five have been supplied.

Donations have been received from the wives of two former governors general, the Marchioness of Willington and the Countess of Reservoir, and other prominent women.

15,000 PATIENTS

Last year the V.O.N. cared for 15,000 patients in the hospitals of the province. The number of patients and in-patients was 15,000. The order has 78 local branches across the Dominion and employs 343 registered nurses.

NEW THEATRE GROUP DOES "AND THE ANSWER IS"

Making their debut before Edmonton audiences, the new amateur theatrical group, the Progressive Arts and Dramatic Society, presented "And the Answer Is" last night. The play, by E. V. Rieu, is a comedy of considerable potential. The cast was excellent, and the production was well handled.

Listen Inn

The running of the world's most celebrated horse race, the English Derby at Epsom Downs, will be brought with all its breathless excitement to North American listeners, Wednesday, June 2, from 6:43 to 7:13 a.m., Edmonton time over the NBC-Blue network.

The description of the classic, short-waved by the British Broadcasting Corporation to NBC, will be made by commentators from several vantage points along the mile and a half humpbacked course. From the cry of "They're Off!" until the finish line is crossed, not a thrill of the historic race will be missed. This year's race is expected to be the most colorful in its long history, which began in 1780. More than 30,000 people are expected to attend.

Minor his baritone and cool. Bob Butts takes his pen in hand to autograph a few pictures of himself. Lots of fan mail gives the NBC commentator plenty of work to do in addition to his Music Hall program.

A WREN BUILT ITS NEST
INSIDE A POWER LAMP.
THE ELECTRIC
LIGHT BULB GAVE THE
BIRD A MODERN LIGHTING
AND HEATING SYSTEM.

It has long been the theory of some scientists that the earth's continents were much nearer to each other in past ages than they are now. South America, Antarctica, Australia, and India can be fitted around Africa like pieces of a jigsaw puzzle. According to those holding to the above theory, the continents actually floated away.

JO-JOTTE —A Pointer

By ELY CULBERTSON

A correspondent asks: "What is the proper time for a declarer to bid a slam at Jo-Jotte? May he bid it after he has seen defender's meld. Also, how good a chance for the slam do you need to make the bid?"

The proper time for a slam bid is at the same time that declarer announces his meld but before any comparison of melds. For example, Declarer announces "twenty" and says: "I bid a slam."

Declarer wants to bid a slam and also has a three-card sequence. He should say "I bid a slam. How high is your twenty?" He may not bid his slam after seeing defender's meld and therefore should not even bid how high he needs a better bidding the slam.

The requirements for a sound slam bid depend on whether or not the defender has bid. If he has bid all the tricks, he will score a trick on him, bid a slam purely as a sacrifice. Even if you don't make your slam your opponent will score only a little more than a hundred, plus a bonus.

Declarer announces "twenty" and says: "I bid a slam."

Declarer wants to bid a slam and also has a three-card sequence. He should say "I bid a slam. How high is your twenty?" He may not bid his slam after seeing defender's meld and therefore should not even bid how high he needs a better bidding the slam.

you need two cards to be buried in the deck or when you have two cards in which you may have a pair. If hearts are trump, this is a good slam bid: 8, A, M, J, A, 10, K, D, A, 10, C, A, 10. But change the suit of hearts to the spades and you see just a little too weak. Lacking both the time and the ace of trumps you would still have a good slam bid if you had seen five cards in length. Note that on your hand actually given all the side suits are solid, so that the only possible lower is a trump. Change one of the side suits to a king and your slam bid is not a good one.

Animals, as well as human beings, are subject to mood blindness.

NORTHERN MINERAL AREAS PROVE SOURCE HUGE WEALTH

Where Minerals Are Found

Edmonton Benefits As Supply Base Of Mine Development

When Gilbert Lake, prospecting for copper on the shores of Great Bear Lake in 1935, picked up a strange, weighty, black mineral which proved to be radium-bearing pitchblende, the north was a closed, sequestered area except in the fur trade.

Lahure's discovery, out of which has grown the present Eldorado mine that last year yielded \$1,200,000 in radium and silver, started a rush of exploration that has expanded with every succeeding year with new discoveries of mineral wealth being made in areas of greater accessibility.

Millions of dollars have been poured into the north for mineral exploration and development and have the country as beginning to yield new dollars from mines, camps and production as shafts and tunnels are driven and mills erected.

BIG PAY ROLL

Transportation and supply base for all this activity is Edmonton which annually receives several million dollars worth of business, supporting food, clothing and many other necessities. A new payroll is developing in the mining fields of the North West Territories and Northern Saskatchewan where at present, various several thousand men. This year alone over two new mills in operation.

Two producing mines, Eldorado and B.E.A.R. are operating at Great Bear Lake, while chief prospecting areas are at Yellowknife Bay and Gravel Lake in the Great Slave Lake section and in the Goldfields and Fond du Lac areas at Lake Athabasca. Progress in all these sections during the past year has been phenomenal.

GREATER PRODUCTION

Eldorado last year mined 2200 tons of ore with a total value of \$1,200,000 and with increased efficiency and better equipment, the company expects to produce 3,000 tons of ore in 1937. B.E.A.R. is also expected to produce 1,000 tons of ore in 1937.

The Yellowknife Bay mine, which has been known to carry 100,000 tons of ore, is also expected to produce 1,000 tons of ore in 1937. The Fond du Lac mine, which has been known to carry 100,000 tons of ore, is also expected to produce 1,000 tons of ore in 1937.

VALUES ARE HIGH

The value of the minerals found in the north is high. The value of the minerals found in the north is high. The value of the minerals found in the north is high.

ELDERADO NO. 2 AREA DEVELOPED

Development work on Eldorado No. 2 shaft continues. The shaft is being sunk to a depth of 50 feet. The shaft is being sunk to a depth of 50 feet. The shaft is being sunk to a depth of 50 feet.

Harbor For Aircraft

Some of the shore of Great Bear Lake, at Lahure Point, is shown above, with four transport vessels moored in the bay.

Prospect Shafts Sunk At Fondulac

During the breaking ground for prospect shafts, are being sunk at the property of Eldorado Mining Corporation, located at Fondulac.

ARMY-N

Diamond Driller

A. J. TOURIGNY,
president of Globe Drilling and Exploration Co. Ltd., Edmonton, now drilling for Vanadium, Lake and on Outpost Island, announced that two new Sullivan diamond drills of latest type are to be sent to Yellowknife and Goldfields immediately after shipment. This company also is drilling for Sulfur and Iron on the west coast of Turner Valley. C. W. Swearing will know a mining enterprise will begin after exploration work for the company.

Last year by Slave Lake Gold Mines Ltd. made possible continued development. Shaft has been sunk and drilling done. In the district, mining activity is being done. The company is also drilling for Sulfur and Iron on the west coast of Turner Valley. C. W. Swearing will know a mining enterprise will begin after exploration work for the company.

NEW COMPANIES

It is reported that the Borealis Syndicate, which has been working in the north and west of Goldfields, and also in the north and west of Goldfields, is now working in the north and west of Goldfields, and also in the north and west of Goldfields.

The Borealis Syndicate, which has been working in the north and west of Goldfields, is now working in the north and west of Goldfields, and also in the north and west of Goldfields.

SHOWS GOOD RESULTS

Goldfield Island, which was mined in 1934 by Don Brady for Atomic Mines, after being mined and abandoned by any purpose of prospecting, is now being mined and abandoned by any purpose of prospecting.

New Process for Filling Hollows Of Worked Mines

When ore is mined from underground in developed mines, large cavern-like chambers or stopes are left in the places from which it has been removed, and it is one of the problems in mining large ore bodies

to fill these stopes after the ore has been drawn from them. Each year, the great mines like Hollinger and Lake Shore dump millions of tons of sand and waste rock back into these empty stopes, often bringing the material from many miles away. How the waste is put into a mass almost as hard as the original rock.

The harmonica was invented by Benjamin Franklin.

ATHONA MINES OPERATE MODEL CAMP OF LAKE ATHABASCA

Company Is Driving Toward Production On Large Holdings

As Told by Jerry Byrne to C. Reader
GOLDFIELDS, Sask.—In the autumn of 1934, gold discoveries were made at what is now known as Goldfields, on the north shore of Lake Athabasca. Great Bear Lake Mines, Ltd., a company formed in 1934 to operate in the Athabasca area, was the first to develop the area. In the Saskatchewan field, several claims were staked and the company, which has a total of 400 acres, is now driving toward production. In addition to a group of claims, approximately 400 acres, shown as the Mt. Group, was staked south of and adjoining the Drilling properties which have recently been formed into Nicholson Mines Ltd.

In May, 1955, the name of the company was changed to Athona Mines Limited, A.T. for Athabasca. The company is now operating in the Athabasca area, where the company has a total of 400 acres. The company is now driving toward production. In addition to a group of claims, approximately 400 acres, shown as the Mt. Group, was staked south of and adjoining the Drilling properties which have recently been formed into Nicholson Mines Ltd.

COMPANY RE-ORGANIZED
The company, which was formed in 1934, was re-organized in 1955. The company is now operating in the Athabasca area, where the company has a total of 400 acres. The company is now driving toward production. In addition to a group of claims, approximately 400 acres, shown as the Mt. Group, was staked south of and adjoining the Drilling properties which have recently been formed into Nicholson Mines Ltd.

HAS MODEL PLANT
Today Athona has a model plant on the Goldfields property, complete in every detail including electric lighting, running water, sewage, and central heat. Equipment includes an assay plant, a fifteen ton test mill, one hundred and twenty five horse stationary diesel engine, a compressor which in turn provides power for all the plant. The carpenter, machine and blacksmith shops are well equipped with everything that is needed for the operation of the plant.

Base Of Air Operations

Base of the Athona, Athabasca, Ltd. in the Goldfields area, near the Saskatchewan-Texas border. The aircraft is a Cessna 441, which is used for transport of personnel and equipment to the mine site.

Two shafts have been sunk on the property. Number 1 is 145 feet in depth and has three compartments. Number 2 is further down but because of difference of elevation on surface both have reached same underground level. Over 4,000 feet of drift and cross-cutting has been done. Approximately 15,000 feet of diamond drilling is completed, thoroughly exploring the area.

CHANCES EXCELLENT
The greatest asset, "Geographical," the chances of developing further large tonnage low grade ore between roads No. 1 and 2 and south towards the property, is excellent. Recent developments of high grade, continuous in the south zone and the favorable structural location of the mine from the point of view of transportation, are of great value. This area could be profitably mined with a mill capable of handling 300 tons or more per day. As yet, no sufficient underground work has been completed to reach such a mill. The test mill was used from December, 1955, until May, 1956, for bulk sampling purposes only to establish a factor to apply to assays which, because of free gold content of samples, run very erratic, ranging from a trace to several hundred dollars a ton.

FIRST GOLD BARS
Athona produced the first gold bar from the Athabasca field while operating the test mill. It is a 12.5-ounce bar, which was produced from a sample of ore which was assayed at 1.5 ounces of gold per ton. The company is now driving toward production. In addition to a group of claims, approximately 400 acres, shown as the Mt. Group, was staked south of and adjoining the Drilling properties which have recently been formed into Nicholson Mines Ltd.

ALBERTA STRENGTHENS POSITION IN MINING IMPORTANCE

Main Development In Coal, Gas And Petroleum Fields

Guides Chamber

The Province of Alberta is steadily strengthening her claim as a mining area of real importance within the Dominion. The wealth of her non-metallic minerals is widely known and she has been prominent in Canada for the richness of her actual potential mineral products.

Alberta's principal mineral development has been confined for 25 years to her production of brown, natural gas and oil. The production figures show 30 per cent of Canada's oil production to come from this province with 72 per cent of the Dominion's natural gas consumption being drawn from the gas fields within in 1935 the Alberta Coal Commission estimated that the production of coal in the province was 14,535 per cent of the world's coal resources and 87.10 per cent of Canada's.

DEVELOPMENT

The discovery of high grade coal, encouraging quantity in southern Turner Valley is responsible for the new development. A new area of two miles on the shore flank of the structure from the new development. A foundation well in the south of Turner Valley No. 3 in the 19th is established. At the present time there are 17 wells producing in the Turner Valley. In 22 wells being drilled.

METAL GAS

Natural gas is prevalent in all parts of the province, with several good fields. Of the latter the most important are Turner Valley, supplying the Calgary and Lethbridge areas, and Viking in the area of Edmonton with connections to all towns and villages in the vicinity of the gas lines.

Total value of oil production in Alberta for 1936 was \$1,215,380. Natural gas consumption in 1936 was 13,125,345 millions of cubic feet, valuations \$28,245.

BITUMINOUS SANDS

Bituminous sands in the McMurray district cover an area of at least 10,000 square miles. Most of the population so far beyond this figure. Out of this vast accumulation the area in which the sands are accessible for mining is probably less than 20 square miles, containing oil reserves estimated at a total of at least one billion barrels.

Petroleum Cliffs

Of years ago the International Bituminous Company, Limited, situated at McMurray, 30 miles down stream from an extraction plant, 30 feet by 20 feet, and a refinery which was built last summer. This refinery, starting more or less in an experimental stage, has a capacity to produce 100 tons of oil per day. The extraction plant, unable last year to come up to this maximum capacity, anticipates this summer the addition of an extra boiler with a view to increased production.

On Horse Creek, two and a half miles from the refinery, the Northern Alberta Railway, Associated Oil Limited anticipate the completion this fall of the first unit of an extraction and refinery plant capable of a production of 100 tons per day, mined and treated, which will eventually be increased to 3000 tons.

COAL RESERVES

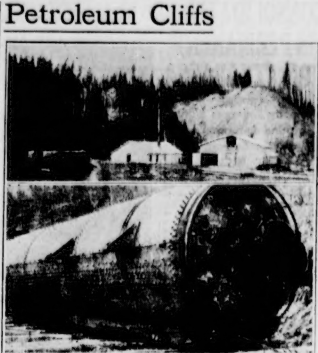

Available coal reserves of the province are estimated at 81 billion tons of which 59 per cent are bituminous, 23 per cent sub-bituminous, and 18 per cent lignite. If the province is to become a coal exporting province, it will need to consider at the present time the estimate would reach the figure of 321 billion tons of which 12 per cent are bituminous, 16 per cent sub-bituminous, and 72 per cent lignite.

SALT DEPOSITS

Development of salt in the McMurray area will start this year. The deposits, some 400 feet from the end of the Northern Alberta Railway, are found at 600 feet from the surface, the deposit having a depth of 100 feet. This well not only provides a commercial body of salt in the immediate vicinity but provides also a definite field for an oil company. The deposits, which are found at 600 feet from the surface, the deposit having a depth of 100 feet. This well not only provides a commercial body of salt in the immediate vicinity but provides also a definite field for an oil company.

LAKE ATHABASCA GOLD

A great industrial future may await Alberta in the Precambrian outcrop which covers an area of some 10,000 square miles in the north-eastern section of the province. Should the claim that the proven district of Goldfields extends westward over the inter-provincial border become substantiated, Alberta will assume a new status and become recognized as a producer of both metallic and non-metallic minerals. Considerable staking for gold was done this spring at Fort Chipewyan.

Boiler room and separation plant of Associated Oil Limited, on Horse Creek, near Fort McMurray, where crude petroleum is to be extracted from the bituminous sands this summer. It shows in the upper photo. An oil sand cliff forms the background of the picture. Lower photo is one of the three shell stills for the refinery, shipped to Waterways this spring. These shells are 40 feet long and eight feet in diameter, inside measurement, and weigh 47,000 pounds each. Another, now being built, is 60 feet long.

\$35 PRICE ON GOLD IS HERE PERMANENTLY

J. Errington Has No Fear of Reduction, He Tells Businessmen

Declaring that the concentration of gold in the hands of Great Britain and United States constitutes an important balance in favor of world peace, Joseph Errington, president of Little Long Lake Gold Mines, and prominent Toronto mining financier, expressed the view there would be no reduction in gold from \$35 an ounce in an address before the Post Arthur Chamber of Commerce.

Mr. Errington, who has just returned from an extended trip to the British Isles and South Africa, based his opinion not only on his own experiences as a gold operator, but from his extensive observations abroad.

"Reduction in the price of gold would not help any one," he declared.

Furthermore, I know of no one in authority who has ever said the price was going to be reduced. In United States because of black shales. Mines there were as hot as 800 feet as in the Precambrian camp at 1000, and it takes four or five years and ten to fifteen million dollars to put a mine in production there that more than 50 per cent of the cost of the mine.

"You sometimes expect too much of us here in Canada," he said. "We may be smart but not great enough to put a mine in production in twelve months. You can't open up Effron hundred feet in six months."

BRITISH LEGION Defence Corps Is Frustrated On

LONDON, May 18.—A proposal that a British Legion defence corps be formed for use in event of an invasion of the United Kingdom was rejected at the Legion's annual meeting here today.

Spokesmen for those in opposition declared the loyalty of the Legion should not be doubted and one added: "If required, we shall be there." Another suggested such a defence corps might not only be employed for defensive purposes but "even turned against the government itself."

Union Officials Run Out Of Town

MONTREAL, May 18.—Two Montreal officials of the United Brotherhood of Carpenters and Joiners of America were ousted from the city of Montreal after a dispute with the local union.

Adolf Weisbecker, the union's business agent here, and Ben Rich, organizer, said they had instructed the union's Montreal attorney to demand an investigation by the Quebec attorney general's department.

Labor Secretariat Ousted By Soviet

MOSCOW, May 18.—The entire secretariat of the Soviet Union union council, except its chief, U. M. Zhukovskiy, was ousted from office today and classified as "enemies of the people."

Among prominent figures jailed were Director Zhukovskiy of the foreign news agency, the Soviet Minister of the Soviet Insurance Bureau, Assistant Director Antokhin of the scientific research institute and Editor Milutin of the official magazine "Insurance Quarterly."

Canada Likely To Refuse Race License

OTTAWA, May 18.—Canada likely will follow the lead of the United States and refuse license for the projected New York to Paris transatlantic air race if efforts are made to shift the take-off to this country. This attitude was indicated here today although French air ministry officials had made no approach to the Canadian government on the subject.

Old Engineer Dies

WINNIPEG, May 18.—William Jackson Little, 72, retired locomotive engineer and one of the Northwest Rebellion scouts in 1885, died here yesterday. Stanley Jackson of Saskatoon is a son.

ALBERTA'S MINERALS

At present the most important are as follows:

- BITUMINOUS SANDS
- NATURAL GAS
- PETROLEUM
- BENTONITE
- PLATINUM
- IRIDIUM
- GYPSEUM
- COAL
- SALT
- MICA
- GOLD

PETROLEUM:—

The Province of Alberta produces 90% of Canada's petroleum. Production for the fiscal year 1936-37 totalled 1,417,661 barrels as compared with 1,245,596 barrels for the preceding year. Active petroleum and natural gas leases at the close of the 1936-37 year numbered 3,965 covering an area of 778,125.69 acres. Prospecting permits at this time totalled 38 which embraced an area of 583,962.78 acres. Producing wells at present number 131 with 43 others drilling and 80 in course of preparation to drill.

TURNER VALLEY

NATURAL GAS:—

Natural gas is prevalent throughout the length and breadth of Alberta with Viking, Turner Valley and Medicine Hat representative of the three largest fields. Alberta's production of natural gas is 72% of the total recoveries of the Dominion.

COAL:—

Alberta's coal areas represent 14.53% of the world's known coal resources and 87.10% of Canada's. The available reserves of this Province are estimated at 61 billion tons of which 59% are bituminous, 23% sub-bituminous and 18% lignite. Production for 1936 totalled 3,696,373 tons with a valuation of \$14,779,004.06. Coke manufactured in 1936 amounted to 65,229 tons and briquettes to 21,013 tons.

BITUMINOUS SANDS AND SALT:—

Development of these two valuable resources in northern Alberta is now under way.

DEPARTMENT OF LANDS AND MINES

AIR TRANSPORTATION SPENSABLE TO NORTHERN MINING

Three Plane Fleets Serve Big Territory From Edmonton Base

Flying hundreds of tons of freight and express, thousands of passengers in the north annual, three fleets of big transport planes operate out of Edmonton, giving an air transport service to the hinterland that is unequalled in any country.

To give a rough idea of the traffic, more pounds of express and mail are carried in western Canada than ever all the air lines of the United States, which have more miles of route and a far greater territory to cover.

Territories served by the Edmonton fleets are in northern Alberta, British Columbia and Saskatchewan, the Yukon and North West Territories.

SHORT SEASON

The mining industry has become dependent on the airplanes for quick transport of men and supplies and for getting of everything from heavy duty mining machinery to perishable food and other goods. Shortness of the season in the far north is a factor which makes quick transport indispensable.

Canadian Airways Limited, operating six aircraft in northern Alberta and Saskatchewan, and four in the North West Territories, last year flew 300,000 miles and carried 300,000 pounds of express, 110,000 pounds of mail and 1,700 passengers, according to statistics received from W. B. "Pop" May, superintendent of the Mackenzie River district. The company's traffic throughout Canada showed 2,668,678

miles, 7,740,925 pounds of express, 293,241 pounds of mail and 20,300 passengers.

SEVEN AIRCRAFT

Operating seven aircraft, Mackenzie Air Service last year flew 276,600 miles, carried 500,000 pounds of express and 1,668 passengers, according to figures issued by W. Leigh Brintnell, president. Following freeze-up this autumn, the company will take over the northern mail contract.

United Air Transport now is operating 10 planes, the largest a trimotor Ford recently purchased by G. W. G. McConachie, president. During some seasons, a number of these aircraft base in northern British Columbia for operations. Another fast craft is to be delivered in August.

Besides operating up-to-date air planes, equipped with radio, these companies maintain their own ground radio stations, supplementing services of the Royal Canadian Signals.

Personnel of these companies include pilots, mechanics, ground crew and clerical staffs. Canadian Airways pilot in this district are W. R. May, Con-way Farrell, Archie McMillan, and Charles Tweed.

Canadian Airways Limited, operating six aircraft in northern Alberta and Saskatchewan, and four in the North West Territories, last year flew 300,000 miles and carried 300,000 pounds of express, 110,000 pounds of mail and 1,700 passengers, according to statistics received from W. B. "Pop" May, superintendent of the Mackenzie River district. The company's traffic throughout Canada showed 2,668,678

MINES CHAMBER SERVING NORTH

Alberta and Northwest chamber of mines, organized last year, already has established itself as a liaison between governmental mine departments, business men, mine operators and workers in the territory served by Edmonton.

Headed by R. C. Marshall as president and L. E. Drummond as secretary-manager, the chamber now maintains intimate contact with all mining developments in northern Alberta, northern Saskatchewan and the Northwest Territories. It keeps available all maps, reports and visiting plans showing progress in the various fields.

Geological survey reports, mining valuations and miners' certificates are obtainable from the chamber, and mining companies keep in constant touch with it. Many obtain their technical staffs and labor through the chambers register of available employees.

Similar organizations have long been established in other mining fields and have proved of infinite value to the operators where questions and problems may be discussed by the representation of all parties interested.

The Chamber of Mines in Edmonton has representatives on the executive. From all transportation companies, both railway and aviation, together with mine operators, representatives and mine operators. Co-ordination of the various two problems.

Members can be arranged through the office so that questions of wages, conditions, hospitalization, and transportation may be conveniently handled. "We trust the chamber of mines will clarify many problems and co-operate with all the developments which are going on during 1937 and succeeding years," said Mr. Drummond.

CONSOLIDATED IS PERMANENT ON ATHABASCA

Company Enlarges Underground drifts and Increases Equipment

By C. BRUIER

GOLDFIELDS, Sask.—That Consolidated Mining and Smelting Company has come to Athabasca to stay is the hope of every resident on Myman's Bay. Every action of the big company has a marked effect on all other activities in the Athabasca mining field and a shut down would practically spell ruin to Goldfields in spite of the efforts of smaller companies and syndicates. But Consolidated Mining has no intention of shutting down its present preparations for a summer of intensive exploration and development can be taken as a stand-ard for judgment.

The company is reported to be enlarging the thousands of feet of underground drifts and crosscuts from five by seven to eight by eight feet in size. It is also reported that such as are in use in the Kimberley mine level have been connected by an underground drift nearly half a mile in length. Millions of tons of low-grade ore have been blocked out.

SEVENTEEN CLAIMS

One or more diamond drills have been in operation almost steadily for the past two years exploring very possible point of the property which is made up of seventeen claims. Options have been held on three adjoining properties in the area. Rex and Marmar. A thousand ton mill is reported to be coming in at open water.

Surveys have been working on Togo River and on Beaverfoot Lake seeking water power to operate a mill. Tractor roads have been made connecting various points of the property in the main camp. Shells, powerhouse and office are connected by telephone, a line of which is now being extended to Goldfields government radio station. A building site is being reserved west of and adjoining Goldfields C.M.S. property in providing building locations for the homes of mine employees.

MORE THAN \$2,000,000 HAVE ALREADY BEEN SPENT DEVELOPING THIS PROPERTY. This coupled with the fact that the company has been increasing both underground and surface crews and has had their airplanes flying, supplies and equipment from end of steel to keep operations going over break-up, can only indicate permanent and progress.

During August, 1934, Tom Box (sometimes considered as co-discoverer with Gus Nymann of the Athabasca field) brought William B. Lewis, Consolidated Mining geologist, to Nymann's Bay and on August 13 the two groups of seven men claimed was staked on the west shore of Tom Box is receiving permanent.

Gus Nymann is credited for making the discovery and showing it to Box, who was staking with him during the summer of 1934. Today however the two groups have taken the name of "The Property." Consolidated Miners referring to it by this name.

FORGED AHEAD

From the outset the Consolidated forged ahead on the Box Property. Log camps were constructed and a diamond drill flown to the property. Alterations were among the first men employed the company drawing from McIntosh Products their gas and diesel engines and generators. As Athabasca is the only mine in the field many flocked in to that province and have since found profitable employment in the mining area.

By June, 1935, C.M.S. had drilled diamond drilling completed to locate a spot to sink a shaft. Within a year a second shaft was being put down and crews increased from half a dozen to over 100 men. During 1936 a new power house was constructed, housing ten 125 H.P. diesels, two compressors and an electric lighting plant.

Log camps have given way to larger and more modern ones of the frame construction. Bulk houses and cookhouse went up with sufficient space to accommodate 250 men. Assays office, machine shop and blacksmith shops were also added.

Two caterpillar tractors were brought in to move equipment from the waterfront to site of shafts and power plant. A private wireless station was installed and the officials here communicate direct with offices at Trail, B.C.

WHITE SUPERVISORS

Percy Bloomer, M.E., has charge of the property although William Lewis, who comes and goes in his private plane, supervises. Both men are well liked by their employees. The mine system of mining and retaining men is used at Kimberley and Trail.

When a man goes on the C.M.S. payroll he is given every opportunity to make good. If he fails on one job he is tried at another. Every one is given to feel that their chances and skills before going out of the gate. Scarcely a man has been discharged since the company started operations here.

The mine system of mining and retaining men is used at Kimberley and Trail.

Good food and bunkhouses and fair working conditions seems to be the motto. At the cookhouse a day and night cook is employed, no matter what the hour. When a man shifts they can go to the cookhouse and get a hot meal, hot coffee and anything up to a full sized meal.

You bet the men hope to see Consolidated go ahead here and many are expecting to see gold bricks being panned before the close of the year.

Oaks here to be sturdy in order to survive, more than 300 insect pests prey on them.

Airways Chiefs

W. R. MAY, O.B.E., Superintendent, Canadian Airways.

BIG ADVANCE IN CANADIAN GOLD OUTPUT

Production Increase \$600,000 In March Over Previous Month

OTTAWA, May 18.—Another forward spurt in Canadian gold production was recorded in March, the Dominion Bureau of Statistics reported today. Production was valued at \$1,113,096, an advance of about \$800,000 from \$103,591 in February.

By weight the output was 326,275 ounces, compared with 319,074 ounces in February and 290,495 ounces in March, 1936.

Production by provinces or districts followed: Ontario 214,755 ounces, Quebec 14,994, British Columbia 16,203, Manitoba and Saskatchewan 3,240, Nova Scotia and Yukon 35.

The world production of gold in March was estimated at 3,033,000 ounces as compared with 2,878,000 ounces in February and 2,690,000 ounces in March, 1936. From South African sources amounted to \$62,000,000 in the preceding month, \$24,000,000 in February and \$18,000,000 in March. The United States production, including the Philippines, totalled 235,025 ounces and consisted of 187,548 ounces from the mint, 17,140 ounces received at private smelters and refiners and 1,337 ounces contained in ore and base bullion export.

SHORT DELAY DUE TO ATHONA BLAZE

Fire caused by a defective engine at the property of Athona Mines, Ltd., near Goldfields, Lake Athabasca, destroyed a steel engine and generator, as well as the building housing them, on May 7. J. J. Byrne, president, denies reports that the entire plant was destroyed and that a delay of two months would be occasioned by the fire.

A diesel engine to replace the one burned is already at the property and it is possible that a new generator will be flown in by airplane about May 20. Instead of a loss of \$30,000, as reported, Mr. Byrne states that total damage will not exceed \$10,000, and is fully covered by insurance.

An order had already been given for the replacement of the engine and two diesels and a large compressor. The cost of increasing the capacity of the plant, this equipment will leave on the first boat after the break-up from Waterways and is expected to reach the property early in June. The crew of the property is building the foundation for the new machinery and it is expected that underground operations will be resumed by June 15 at the latest.

At the time the fire broke out, the plant was producing 1,100 feet of air per minute. The crew has been laid off because of the fire and was preparing the foundations are carrying on surface diamond drilling, and enlarging the dock.

Vancouver Sun Buys 17-Storey Binkins Block

VANCOUVER, May 17.—The Vancouver Sun, whose business and editorial offices were burned by fire March 22, will shortly be housed in the downtown 17-storey Binkins building, directors of the Sun Publishing Company announced here today. It was formerly the Vancouver Sun building.

At the same time announcement was made of purchase of a new (Globe) high-speed press, capable of printing 80,000 40-page newspapers an hour. A 16-page (Hoe) color press will also be installed in the new quarters.

Company Blamed In Rail Fatality

SPRINGHILL, N.S., May 18.—The railway company did not take proper precautions against the May 5 collision between the "Ocean Limited" and a string of runaway coal cars that killed six men, a coroner's jury found last night.

The verdict was returned at the conclusion of an inquest into the death of Clarence Baur, of Moncton, N.B., 67-year-old driver, who was killed when the coal cars were out of control, broke away and rolled out of the station into the street of the Montreal-Halifax express, was overturned.

When a man goes on the C.M.S. payroll he is given every opportunity to make good. If he fails on one job he is tried at another. Every one is given to feel that their chances and skills before going out of the gate. Scarcely a man has been discharged since the company started operations here.

The mine system of mining and retaining men is used at Kimberley and Trail.

Good food and bunkhouses and fair working conditions seems to be the motto. At the cookhouse a day and night cook is employed, no matter what the hour. When a man shifts they can go to the cookhouse and get a hot meal, hot coffee and anything up to a full sized meal.

Looking Them Over

By Jack Kelly

Boyle Street
Doing Nobly
Handicaps

LAST night the Boyle Street Senior Baseball League got away to an official start with Morgan's Cardinals handling the National Home A's. It now seems fairly certain that this will be the only senior ball game in Edmonton this season. The question of whether or not the league will move to Renfrew Park remains far from being settled. It is a matter of percentages and guarantees that is holding up the move.

While there were one or two spots in last night's game that would hardly rate as brilliant, the calibre on the whole was interesting and gave promise of developing into ball that no reasonable man could complain about. When you are watching ball on Boyle Street you have to remember that the grounds are far from good. It has been shown several times that a team from this diamond will look at least 25 per cent better on the almost-perfect infield and outfield at Renfrew Park.

With all its drawbacks, the fact still remains that Boyle Street has been the incubator which has kept baseball alive in Edmonton year in and year out. There has been no money in it—only grief for the officials and the fun of the game for the players.

If the call does not happen to be all that exciting fans desire, it must be remembered that all concerned are trying to do their best. No player deliberately makes an error. We all pull a few nothings here and there in the line we are trying to make a living at, but fortunately no mereless box scores records them for the public. The gate and collections at Boyle Street barely cover the costs of the balls, umpires and upkeep of the grounds. It is impossible therefore for the teams to bring in money players to bolster up weak spots.

☆☆☆

Doing Right Nobly

UNDETERRED by the circumstances, the Boyle Street League is doing nobly. It is impossible to simply a matter of money—even in hockey. If you have a well-fitted sock to wear on you can find a classy team with less effort than it takes to find a equal of purely local talent. I never could work up much enthusiasm about such a thing, but I have to admit, however, that if they didn't have great teams in view of the resources behind them.

There is a type of fan that unconsciously hates purely local sport more than anything else. He is the lad who has a sort of egotism in his eye. He wants to see what is new and what is not. He is not so much interested in the game as he is in the players. He is not so much interested in the game as he is in the players. He is not so much interested in the game as he is in the players.

In the past it has been proven conclusively that Edmonton has not enough of these exiles of sport to make it financially feasible to field two pro ball clubs. From a certain number of fans there is an incessant demand for better ball, but the gates do not keep pace with the extra cost involved. One fast pro club here would be profitable with equally good teams in Wetaskiwin, Camrose and Ponoka. That is the only basis on which we will ever have permanent ball here of a calibre satisfactory to all. With such a league, there would still be room for a four-team city loop.

What next year will bring in the matter of control of Renfrew Park is impossible to forecast at present. A clean-cut new deal would certainly be welcomed by the fans, although the most of the gossip that has been going the rounds for years is built up on misinformation about the situation or is unjust to one or more of the parties concerned. I have met dozens of fans who are all steamed up with these rumors. After explaining the exact situation and asking them what they would do if they were admitted in the shoes of the various parties concerned, the most of them have admitted they could do nothing beyond what has already been done.

Sopwith's Yacht

Nears U.S. Waters
On Cup Invention

BRISTOL, May 18.—The O. M. Sopwith's Endeavor II, built in his home challenge for the America's Cup, most cherished of all yachting trophies, approached the New England coast Monday night.

The coast guard patrol boat Pusan will be the first to meet her and convey greetings to the British invader. The Pusan will escort the fast racing sloop and her crew, the John, a little Belgian fishing trawler, to Newport, center of the forthcoming international sailing contest, hence up Narragansett Bay to Bristol.

Here, the Herreshoff shipyard has orders from Sopwith to prepare Endeavor for her attempt to tilt the cup, which has been won by Americans ever since the schooner yacht America brought it from England in 1851.

Somewhere in Endeavor II's wake is Endeavor I, Sopwith's unsuccessful challenger of 1914. Sopwith has said he would not decide until after a series of trials which of the two sloops he would use in his second bid for the cup.

Freddie Miller

Outpoints Fisher
New York, May 18.—Freddie Miller of Cincinnati, former world featherweight champion, easily outpointed Maxie Fisher of Newark, N.J., in their eighth-round boxing bout Monday night.

Miller, who has a record of 18-1-1, was the aggressor from the start, and his jabbing and straight punches were as effective as early as the first round.

Philadelpha A's Defeat

Yankees for First Place

Card Here

PHILADELPHIA Athletics are back in the first place in the American League. Monday the A's, taking advantage of a wild throw in the eighth inning by Catcher Bill Dickey, turned back New York Yankees by a 3-2 margin.

Philadelphia's triumph, outside of pacing them to the top, made slight changes in the standings. It boosted Cleveland to third place and Detroit to fourth, slipping Boston Red Sox to fifth place and they were defeated by Washington Senators, 4-5.

NELSON STEALS SHOW

Lynn Nelson, Philadelphia relief pitcher, stole the show in the Athletics-Yankees game. Taking the mound in the first after Cosselli had greeted Lou Gehrig with a homer and Red Ruffalo and Tom Henrich had followed with single and two-run homer, Nelson struck out seven, retiring Lou Gehrig and Cosselli on nine pitches in the sixth.

Winning Rookie Pitcher

Moore, together with shaker relief pitcher, gave the Athletics a victory over the Red Sox.

He was the only National League game.
